(w/Alpha part, if approp.)

SECTION B. - SHELTER SPACES IN FACILITY  
(Use latest NFSS or Updating Survey Data)

1. Number of existing PF Category 2-8 shelter spaces 802
2. Number of improvable ("Added") shelter spaces \_\_\_\_\_

SECTION C. - WATER AVAILABLE IN SUPPLY SYSTEMS

(Enter for each of the systems listed below, gallons of water available in the same building as the shelter. These quantities are to exclude any water presently stored in CD drums as part of the fallout shelter stocks.)

1. Normal Supplies (Including Plumbing System, Only):

Remarks: (Source of data; type of contaminant, if readily available; brief, description of well or spring including pump, power, and estimated reliability other pertinent items).

## SECTION D - COST ESTIMATES

(Enter cost estimates for making available to shelterees the total quantities of potable and non-potable water shown in Columns (1) and (2) of Section C. Estimates are for planning purposes, only, and will be based upon the best on-site information readily available. Include under "Remarks" a brief description of modifications and major features contributing to the costs. If desired, a simple sketch may be attached)

SECTION E - SEWERAGE SYSTEMS

(Section E will be completed only when quantities are shown in the "Potable" column in Section C)

1. Estimated sewage quantity:

802 Gal/day

(Use 1 gal/day/space for the number of shelter spaces shown in Item B-1.  
Note: This figure is assumed for the purposes of this survey only, and includes an allowance for flushing).

2. Estimated capacity of sewer main(s) from building:

480,000 Gal/day

(Include existing sanitary, storm and/or other sewer mains which operate by gravity flow, only. Do not include flow from a sewage lift station in building unless stand-by power is available for its operation).

3. Water closets available to shelters:

55 Units

(Include all water closets within or accessible to the shelter areas in the building without direct exposure of personnel to radiation).

4. Estimated modification costs:

\$ 0

(Modifications will be considered only when entry in Item 2 is less than Item 1, above; or when shelter area(s) have no access to a gravity sewer or storm drain without direct exposure of personnel to radiation. Include modifications, such as the addition of a "wye" or "tee" for access into the line. Do not include items such as major extensions to or re-routing of existing lines, or addition of pumps or power for pumping. Cost estimates are for planning purposes, only and will be based upon the best on-site information readily available. If desired, a simple sketch may be attached).

Remarks: (Include brief description of proposed modifications and statement as to remaining deficiency, if any, to meet requirement in Item 1, above).
